Sawyer Nelson

Operations & Organizational Leadership

Dallas, TX

Profile

I'm an operations leader with experience running departments and making decisions across functions. I figure out what's actually happening, what the organization needs to be capable of, and what has to change. Then I make those changes, learn from what happens, and keep adjusting until the organization can do what it needs to do.

Experience

Director, Strategic Operations · OxeFit · *Jan 2023–Present*

Report directly to the CEO of a Series A fitness-tech company (~115 people) spanning hardware, software, subscriptions, and direct-to-consumer and commercial sales. Lead cross-functional work without a dedicated team.

- **Serve as Compliance Officer**, reporting directly to the Board and building the company's compliance program
- **Built the company's commercial data backbone** across customer, order, forecasting, inventory, and product data
- **Co-ran digital marketing end-to-end for 2+ years**, jointly owning the full function — paid media ($MM annual spend), customer outreach, earned media, measurement, the company website and channel strategy
- **Designed reporting across five functions**, defining metrics and building the pipelines to give leadership on-demand visibility into revenue performance, product usage, and team productivity
- **Caught $600K+ contractor fraud** in the ads function by tracing concealed billing through months of transactions
- **Defined the company's liability insurance strategy** and led negotiations to secure broader coverage at lower cost

Credentialing Manager · Signify Health · *Sep 2021–Jan 2023*

Led a 30-person credentialing and enrollment function for a network of ~12,000 active providers, from initial application through ongoing participation. Set the function's standards and policy (committee review, file verification), which shaped the terms of future delegation agreements. Owned credentialing governance: ongoing monitoring, health-plan audits, and NCQA (health-plan quality accreditation) review.

- **Cut credentialing turnaround from 83 days to 12**
- **Proposed and secured NCQA accreditation within 18 months**, using payer relationships and increased service volume to make the business case
- **Promoted and coached three coordinators into supervisor roles**, developing them as first-time managers
- **Introduced seven functionally specialized teams and frontline management** across a department previously organized around a single role

Recruiting Operations Manager → Manager, Network Activation · Signify Health · *Oct 2019–Sep 2021*

Built and led a new team within Recruiting to move providers through credentialing faster. Proved the model and was spun out into our own department (Network Activation) to expand and formalize our work.

- **Defined how a new function would work** — its scope, roles, policies, processes, training — then hired and trained 11 people new to credentialing, fully remotely
- **Retained ownership of the credentialing department's core systems through multiple role changes** while other managers led the team; managed MD App and MD Staff and trained 100+ staff on their use
- **Quantified the team's revenue contribution** by measuring accelerated turnaround against baseline and translating the gained capacity directly into revenue
- **Built a shared intake structure across six functions**, connecting work that ran in parallel and ending duplication
- **Retained all 11 team members through the elimination of commissions**, negotiating higher base pay and arranging new roles and transfers across departments.

Credentialing Coordinator · Signify Health · *2019*
Credentialing Assistant · Signify Health · *2018–2019*
